HIYORIYAMA PARK

This is one of the major historical places that haiku poet Matsuo Basho visited. Because of its location as an excellent vantage point to see the progress of construction work on the memorial park area that was most badly damaged by the tsunami, Hiyoriyama Park has become a mecca for people to visit to get an idea of how reconstruction here is progressing.

You may get an idea of what Basho himself saw?!

Through the torii gateway on the south side of the park you can get views of the Pacific Ocean, while the northern side affords views of the city around the Kitakami River

Tour de Tohoku

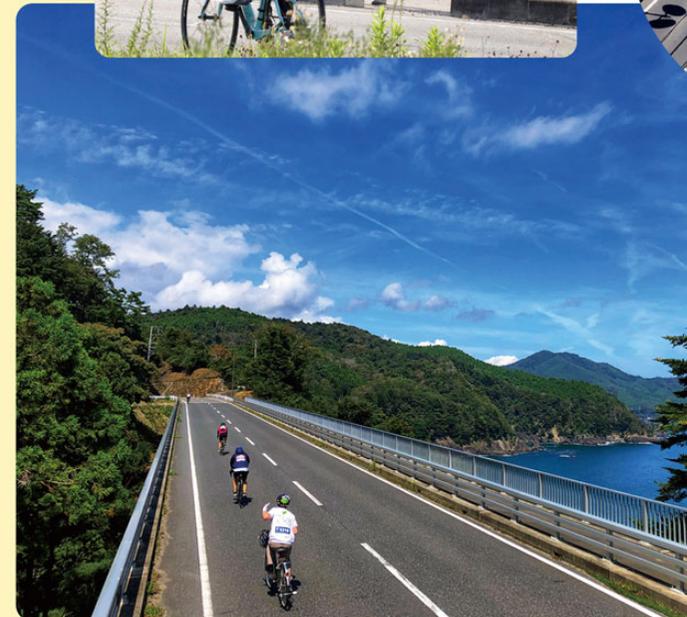

Tour de Tohoku was devised not for competition, but as a means to keep the memory of the Great East Japan Earthquake and tsunami alive and support the reconstruction effort.

And of course, a way to just enjoy cycling!

The whole event has been planned so that you can not only learn about the reconstruction, but also enjoy the beautiful scenery and delicious food that only this area can offer!

We are really hoping that Tour de Tohoku will bring more and more tourists to the TOHOKU area
